

HARSH KUMAR GUPTA

AI Engineer & Product Architect | Human-Centered AI | Recommendation Systems

India | your.email@email.com | +91-XXXXXXXXXX | [linkedin.com/in/harshkgupta](https://www.linkedin.com/in/harshkgupta) | github.com/HarshkumarG007

PROFESSIONAL SUMMARY

Visionary AI Engineer and Product Architect bridging the gap between artificial intelligence and human behavior. Creator of Moodies™, a full-scale AI-powered emotional intelligence platform. Combines a rigorous analytical foundation in mathematics and physics with deep expertise in Machine Learning, NLP, and recommendation systems. Backed by an extensive portfolio of advanced credentials from IBM and Google across generative AI, data architecture, and full-stack automation. Brings over a decade of disciplined, cross-functional mastery to build scalable, empathetic, and high-impact AI ecosystems.

TECHNICAL SKILLS

- **Languages:** Python, Java, C, SQL, JavaScript, HTML5/CSS3, Dart (Flutter)
- **AI, ML & Data:** Natural Language Processing (NLP), Recommendation Systems, Sentiment Analysis, Generative AI, Supervised/Unsupervised Learning
- **Frameworks & Cloud:** Django, IBM Watsonx, Firebase, WebSockets, RESTful APIs
- **Databases:** PostgreSQL, MongoDB
- **Tools & DevOps:** Git, GitHub, VS Code, CI/CD pipelines, Agile Methodology

PROFESSIONAL EXPERIENCE

Arque Technologies | Varanasi, India

AI & Robotics Specialist | Jan 2024 – Present

- Spearhead the development and deployment of advanced AI and Python training modules, grounding complex theoretical concepts in practical, impact-driven real-world problem statements.
- Mentor cross-functional teams on human-centric AI design, ethics, and full-stack deployment, successfully guiding multiple student teams to national-level robotics and AI competitions.
- Architect and optimize emerging technology curricula, improving technical comprehension and hands-on coding proficiency across diverse cohorts.

KEY PROJECTS & FOUNDATIONAL INNOVATIONS

Moodies™ | AI-Powered Emotional Intelligence Ecosystem | *Founder & AI Architect*

- Architected and deployed a comprehensive emotion-aware AI platform leveraging sentiment analysis, contextual inputs, and behavioral signals to decode user moods in real time.
- Engineered a highly personalized recommendation engine targeting content, movies, and experiences to bridge mental well-being gaps and reduce decision fatigue.
- Developed "Moodies for Partners™," implementing WebSockets for real-time emotional syncing and AI-assisted communication designed for long-distance relationship management.
- **Tech Stack:** Python, NLP, Django, PostgreSQL, MongoDB, Firebase, Flutter.

Project Aether | Advanced AI Application | github.com/HarshkumarG007/Project-Aether

- Engineered a scalable, end-to-end AI workflow, focusing on robust data ingestion, model optimization, and high-performance inference.
- Implemented clean, modular architecture to ensure seamless integration between the machine learning backend and user-facing interfaces, ensuring low latency and high reliability.
- **Tech Stack:** Python, Machine Learning Frameworks, Git, Data Pipelines.

Netflix-RecSys | Hybrid Recommendation Engine | github.com/HarshkumarG007/netflix_recsys

- Developed a scalable movie recommendation system inspired by Netflix's architecture, leveraging Collaborative Filtering and Content-Based Filtering techniques.
- Processed and engineered large-scale user interaction datasets to extract latent features, significantly improving prediction accuracy and personalized content delivery.
- **Tech Stack:** Python, Pandas, Scikit-Learn, Matrix Factorization, Data Preprocessing.

NOVELia | Emotion-Aware AI Book Chatbot | github.com/HarshkumarG007/PBEL-NOVELia-AI-chatbot

- Built and trained an emotion-aware conversational agent utilizing IBM Watsonx Assistant to provide dynamic, mood-to-genre mapped reading recommendations.
- Deployed the chatbot live via GitHub Pages, demonstrating end-to-end cloud AI integration and responsive UX design.

CERTIFICATIONS & AWARDS

IBM SkillsBuild Credentials (2026) | *AI & Machine Learning Specializations*

- **Core AI & ML:** Natural Language Processing (NLP), Supervised Learning Methods, Unsupervised Learning Methods, Getting Started with Generative AI, AI Fundamentals.
- **Applied AI:** AI-Enabled Applications for Customer Service, Data Analytics for Machine Learning.
- **Award:** Recognized as an *IBM SkillsBuild Faculty* member (Valid through 2028).

Internship Award: IBM PBEL Virtual Internship 2025 (AI/ML Domain)

- 6-month intensive project-based internship in AI, ML, and Data Science.

Google Professional Certificates (Coursera, 2024) | *Grow with Google Scholarship Recipient*

- **AI & Data:** Advanced Data Analytics, Data Analytics, Business Intelligence, AI Essentials, Prompting Essentials.
- **Engineering & IT:** IT Automation with Python, Cybersecurity, IT Support.
- **Product & Management:** UX Design, Project Management (v2), Digital Marketing & E-Commerce.

EDUCATION

Master of Computer Applications (MCA) | Kashi Institute of Technology (AKTU) | Sep 2023 – Aug 2025

- CGPA: 7.56 | 71.2%

Master of Arts — Yoga and Science of Living | Jain Vishva Bharati Institute | Sep 2023 – Nov 2025

- 68.2% | First Division. Focus: Psychology, Behavioral Science, and Self-Management.

Diploma in Pharmacy (D.Pharm) | Board of Technical Education, UP | Completed Feb 2025

- 63.5%

Bachelor of Science (B.Sc.) — Mathematics | Jagatpur PG College, Varanasi | 2019 – 2022

- Major: Mathematics | Final Year: Mathematics & Physics. Built the quantitative foundation for AI and algorithm design.

ADDITIONAL PROFILE DATA

- **Multidisciplinary Discipline:** 15+ years of rigorous martial arts, gymnastics, and physical training; applies the same elite discipline and precision to mastering deep tech and product engineering.
- **Media & UX Perspective:** 6+ years of digital video production, VFX, and graphic design experience, lending a strong visual and user-experience edge to front-end AI development.
